

Default

(When your case is in arrears)

- An Obligor is considered in Default when he/she is behind in payments totaling one month or more of his/her current support obligation. (See Terms and Definitions information sheet– Arrears).
- When the Obligor owes in excess of one month's obligation a Notice of Default and Potential Action will be automatically generated by SETS. The Default Notice will be sent to the Obligor warning him/her of possible enforcement remedies that the CSEA may take to secure the past due support obligation. ***When a case goes into Default, this is the beginning of the Enforcement Process.***
- Possible enforcement remedies include, but are not limited to:
 - SETS Automated Reporting to Credit Bureau Agencies
 - Securing additional money to pay off arrears (CSEA may withhold an additional 20% of the current support obligation)
 - Driver's License Suspension
 - Tax Refund Intercept
 - Legal Action in Court
 - Financial Institution Data Match (FIDM – see additional sheet)

Please note the additional enclosed information sheets for further explanations of possible enforcement actions.
